

THE BLAIRMORE ENTERPRISE

VOL. XVI, NO. 9.

BLAIRMORE WINS IN FIRST PLAY-OFF GAME

The first of the home-and-home play-off games for the championship of the Crows' Nest Pass Hockey League was played on Coleman Crystal Rink on Monday night before the smallest crowd of spectators of the season.

Anderson, of Bellevue, referred, and his work was done well.

From beginning to end, the Blairmore Bruins had the edge of play and the score at the finish counted two to one, while really Blairmore had scored another that wasn't allowed.

The return game is to be played on the local arena tonight and promises to be a bummer.

While Anderson will also handle this game, we understand that no arrangements have been made with

him by the locals to do the scoring for them. The total goals for the two games will count.

Blairmore now stands as the only team of the Crown League really qualified to enter the provincial championship or Allan cup series.

Some stout people sometimes wish they were like their lean friends, and had not to carry around so much surplus weight. Here is a recipe which might be helpful, given by a Vienna doctor. His method of making fat persons thin is by scrubbing them with an ordinary scrubbing brush, such as is used on floors. The scrubbing takes place four or five times a day and the brush is applied as vigorously as the person can endure. After each scrubbing the patient is given a shower bath, cold, if the patient can stand it.

BLAIRMORE, ALBERTA.

THURSDAY, FEBRUARY 26, 1925.

REGULAR COUNCIL MEETING

LEGISLATURE OPENS

LUNDBRECK COAL PROPERTY TO CHANGE HANDS

The regular meeting of the town council on Monday last afforded the retiring councillors, Messrs. Evan Morgan and J. A. McDonald, to bid farewell to that body for a while. There were present Mayor McLeod, Councillors J. A. McDonald, J. Montalbetti, A. E. Ferguson, J. E. Gillis, second and third were Misses Denise W. Patterson and Evan Morgan, and Secretary Wright.

The minutes of previous meeting were approved as read and the following accruals were passed for payment, subject to approval by commissioners: S. Romeo \$5.00, C. N. Pass Motors \$5.00, C. Byers \$7.00, Canadian General Electric Co. \$76.01, Blairmore Pharmacy \$48.90, Christie Grant Co. \$24.00, Blairmore Enterprise \$143.65, the Attorney-General's Department \$24.00, Town Petty Cash \$22.05.

In connection with the Blairmore Enterprise account for publication of auditor's report, etc., one councillor knew no better than to suggest that tenders for the publication of the town's financial statement should be called for.

Several applications for relief were referred to Mayor McLeod for investigation.

The unemployment situation was given some consideration.

Retiring councillors, Evan Morgan and J. A. McDonald, took occasion to bid farewell to the council. Mayor McLeod and Councillor Gillis expressed regret that such capable members should be obliged to sever connection with the aldermanic body.

At 10 o'clock, the result of the carnival queen contest was announced and shortly afterwards the Queen of the Carnival entered the arena on the arm of Mr. J. E. Upton. The procession was led to the center of the arena by His Worship Mayor McLeod, who in fitting terms congratulated the successful candidate and placed upon her head the emblem of her sovereignty.

General skating and moccasin dancing followed, in which hundreds participated.

We understand that as a result of the carnival upwards of \$700 was netted. The total gross proceeds amounted to \$1018.55.

—

BELLEVUE TURNS TRICK

The sympathy of the sport-loving public of the district is with the Bellevue Hockey Club in their action on Friday last in refusing to play the big hockey game at Coleman.

Coleman, or as we learn, one man of Coleman, entered protest against Bellevue, challenging the qualifications of the latter's goalie, Talbot. The Coleman Club, as well as others, knew full well before the schedule started just to what extent this same Talbot qualified, and it is the belief of the public that no such protest would have been suggested had the Coleman team completed the season without a defeat. This fact alone should have been taken into consideration by the A.A.H.A., who should have warranted the protest being thrown out. Bellevue are aware that protests could have been lodged successfully this season against Coleman, but out of pure sportsmanship no action was taken.

As a result of the action of the A.A.H.A., Bellevue refused to play at Coleman on Friday night last, and the move on the part of Coleman has been the most expensive they could have undertaken. The loss of a gate of possibly \$1500 and the fee to Referee Scott, of Calgary, will give some slight idea of what a small bit of nonsense has cost Coleman.

Hundreds of thousands of dollars are lost annually through the unwise investment or careless spending of monies received for insurance death claims and matured endowments. A Union Bank Savings Account is the proper place for the deposit of such monies. The funds will then be in safe keeping and earning interest for the beneficiaries.

A Dangerous Campaign

An increasingly aggressive campaign is being waged in different parts of Canada by certain organizations and interests, one of the objectives of the Dominion Government of a policy of export duties, or embargoes, on a number of Canadian products, and the list of such products is being added to as the campaign progresses. This, too, is inevitable because if "protection" is to be provided in one case, it is promptly demanded by others, and, further, the imposition of export duties on one article insensibly affects other articles and industries.

Canada has for the past forty years experimented with the policy of protective duties on imports, but few people will be found to declare that the policy has proven a success and brought that development of natural resources and industry, that absence of unemployment, that increase in population, and that abounding prosperity, which the advocates of high tariff protection claim for it. On the contrary, manufacturers, artisans, laborers and the great body of the consuming public are all complaining and clamoring for something which tariff protection has failed to give them and can never give them.

The people of Canada are now asked to experiment with the policy of export duties on top of import duties. These export duties will, so the advocates say, develop our natural resources for home use, encourage manufacturing industries, provide employment, increase population, and bring national prosperity. It is a wise experiment, designed to accomplish what the import duties were to have done and failed to do.

The economic and fiscal programme now being mapped out in these "protective" quarters contemplates higher import duties to keep out of Canada foreign-made articles, and the imposition of export duties to prevent Canadian products going out of the Dominion except in a completely manufactured state.

Among the products, or natural resources, upon which it has thus far been proposed that export duties should be imposed are logs and pulpwood, water powers and the electrical energy developed from the same, nickel and wheat. While import duties are advocated and imposed as against the whole world, the export duties are clearly designed to be imposed against one country only, namely, the United States.

Supposing the United States chose to regard such a policy as an "unfriendly act" and adopted a policy of retaliation. What then? What would happen to the cotton mills of Canada and of Great Britain if the United States imposed a prohibitive export duty on raw cotton as a reply to the Canadian imposition of an export duty on pulpwood? Would Canadian and British industry be benefited, increased employment provided, added population and increased prosperity result?

Or, suppose in reply to a Canadian embargo on the export of hydro-electric power, or an export duty on nickel or logs, the United States imposed a prohibitive export duty on coal, what would be the result to the manufacturers of Ontario and Quebec, not to speak of the average householder and business man?

And, if Canada should practically prohibit the export of wheat to the United States, who could complain if, in turn, the United States proceeded to put a stop to export of oranges, bananas, lemons, raisins, and other articles of food which Canada cannot itself produce?

No man in his senses would propose an export duty on Canadian wheat going to all countries, because Canada must export its wheat. It cannot mill it all into flour, and even if we could add, Canadians could not consume it, and other countries might well say "If you won't let us have any of your wheat, we don't want your flour." A general export duty on Canada's wheat would simply paralyze the Dominion. It would be a terrible price to pay to further the flour milling industry which, as it is, is growing by leaps and bounds and paying good dividends.

These two neighboring countries, the United States and Canada, are in many respects complements to each other. In regard to certain products they are inter-dependent. Man, not nature, drew the Vaughan dividing line across the continent from east to west, a line upon which the good sense of both peoples has been tried. The result is mutual satisfaction. The United States has been the chief offender, but it was Canada who rejected the last overtures in 1911 for greater freedom in trade. It should be the policy of both countries now to lower the existing barriers, rather than to raise them or create new ones. Both countries would benefit from such a policy.

On the other hand, both must suffer from the inauguration of policies leading to retaliatory export duties, and possibly the greatest loss of all would be a lessening of the good feeling now prevailing between the Dominion and the Republic and the engendering of feelings of bitterness and hostility. It is sincerely to be hoped that Canadian statesmen will hesitate a long time before being stampeded into adopting a policy of export duties. Apart from everything else, Canada has not yet reached that stage of development, nor attained that population, where the imposition of export duties are either desirable or necessary.

Last Annuity to Employees

Prince Roland Bonaparte, of the Avenue d'Iena, Paris, a grand-nephew of the Emperor Napoleon, president of the Geographical Society of Paris, who died April 11, had an aged wife, five years, left property valued at \$12,556 in England. He gave an annuity of \$1,000 to the value of their annual appointments to his secretaries, employees, librarians, valets, domestic servants, cooks, doorkeepers and laborers in his service.

New Type of Bee

Professor Moschenkow, of Moscow, is reported to have bred a new type of bee which is a cross between a mother bee and a working bee. This Russian scientist is said to have been working for over a year, and the ovaries of the mother bee fully developed and also the wax glands of the working bee. The professor believes it may be of great value in bee culture.

Wallpaper Two Centuries Old

A unique wallpaper, 200 years old, will be mounted this month in a room being built in the English furniture galleries at South Kensington Museum. The room will be a copy of an eighteenth century apartment and will contain furniture made at or about the time when Queen Anne died. The wallpaper has been taken from a room in an old house in Gloucester, where it has hung for two centuries.

Rocky Mountain Sheep For Austria

A somewhat unusual consignment passed through Montreal recently in care of the Dominion Express Company in the form of six Rocky Mountain sheep, which are exotic to Austria to form part of a zoological exhibit there. The animals, which are valued at \$600, came from the National Park at Banff, Alberta, and will travel to their destination via New York.

Dairymen Meet At Vancouver

Saskatchewan Carries Off Honors in the Ice Cream Competition. After five years' effort, a batch on which a Western Canada Dairymen's Association, that will function for all parts of the industry and link up the provincial association and the national dairy council, has been evolved by a committee at the dairy convention held in Vancouver.

Winnipeg was chosen as the next place of annual meeting.

Twenty entrants in the ice cream competition put on in Vancouver in connection with the Western Dairy Association, formed one of the best contests ever held in this section of the dairy industry. The judges were Prof. Basil Dixon, of the State University of Wisconsin, and Dr. George C. Smith, of the University of Ford, Ont. Saskatchewan carried off a first with, four, wins out of five prizes. Saskatchewan Co-operative Creameries Limited, Saskatchewan, won first prize with a score of 75 out of a possible 80. The Saskatchewan Co-operative, Weyburn, was second, with a score of 74; 25; Souris Valley Creamery, Estevan, was third with a score of 74; tenth went to the Northwest Creamery, Victoria, with a total score of 73; fifth to the Saskatchewan Creamery and Ice Cream Company, Regina, with a score of 73.

HELP FOR TIRED NERVOUS PEOPLE

Found in the Use of Dr. Williams' Pink Pills

Are you pale and weak, tired most of the time, out of breath or flighty?

Are you nervous, is your sleep disturbed so that rest does not refresh you?

Is your appetite poor, your digestion weak and do you have pains after eating?

Do you have any of these symptoms

you need the help of such a reliable tonic as Dr. Williams' Pink Pills?

Write for free sample of Dr. Williams' Pink Pills and I now

returning from overseas," writes Mr. Francis, "my whole system was then in a bad, run-down condition. I became nervous, irritable and lost weight.

Of course I was given treatment

and recommended many tonics,

some of which I took but none to any apparent effect. At last I consulted

my doctor. My sister, who is in England, wrote and urged me to give Dr. Williams' Pink Pills a trial, and I took her advice. My friends were surprised at my complete recovery, but I assumed that it was due entirely to Dr. Williams' Pink Pills and I now always keep a box on hand in case of emergency."

If you are ailing give Dr. Williams' Pink Pills a trial, and I

will send you a sample of Dr. Williams' Pink Pills and I now

If you are ailing give Dr. Williams' Pink Pills a trial, and I

will send you a sample of Dr. Williams' Pink

MUST UNITE TO SECURE BENEFITS FOR THE WEST

Winnipeg.—There is a better morale among the people of the provinces today, due to a good crop and higher prices, and one of the problems of a meeting like this is to capitalize this improved morale," declared Premier Bracken in welcoming the delegates to the second Manitoba economic conference.

Declaring that the east was dependent on western prosperity for its prosperity, and that therefore it was not economy that the west should be ruined by Ontario and Quebec, Mayor R. H. Webb, of Winnipeg, said: "One of the things that we can do is to keep our forces from Fort William to the Pacific coast, irrespective of politics."

He added: "We never will get what we want from Ottawa until the west is a unit."

Mr. Webb, who is a strong advocate of the Hudson's Bay route, was referring to the endeavors made to have the Hudson's Bay Railway completed and Premier Mackenzie King's repeated statement that for economic reasons the railway could not be built; the mayor asserted that millions of dollars were being spent in Toronto and Montreal on work of less importance and urgency.

France To Raise Loan

Expect to Secure Credit of \$100,000,000 in United States

PARIS.—The French minister of finance, closed the general discussion of the finance bill of the budget by a speech in the Chamber of Deputies, breathing confidence in France's ability to overcome the difficulties of her financial situation.

"It is clearly understood," he said, "that this very cornerstone of the restoration of the treasury to a healthy condition is a foreign loan. Conversations have begun on this subject, and I have a semi-official promise that as soon as the budget is voted an issue of \$100,000,000 will be possible in America."

"This loan, and one which will be raised for the devastated regions, will supply our coffers with fresh money, and we shall be able to bring pressure on exchange."

On this loan, the finance minister described as one to be issued by certain of the devastated departments "abroad" to the extent of thirty-five to forty million dollars. "It is recalled that the power to issue such loans, which formerly was granted to devastated districts, has been suspended for a long time; so the government intends to change this policy to again permit the raising of loans by certain sections of these regions."

Alberta Legislature

Prevailing Impression is That Session Will Be a Short One

Edmonton.—With all galleries crowded to the limit of their capacity, the Alberta Legislature was opened by Chief Justice Horace Harvey, deputizing for Lieutenant-Governor Brett, who is unavoidably absent in the United States.

Hon. Charles Stewart, minister of the Interior, was amongst those present.

Indications are that the session will be a short one. There are several government and private bills to be presented, but the prevailing impression is that none will produce debates of any length, and it is the desire of the government to clear the decks as soon as possible.

Britain Expanding Air Service

Grant of \$21,319,000 Asked For

London.—Parliament will be asked to sanction an expenditure of £21,319,000 for the maintenance and expansion of the air force during the financial year 1925-26, the air secretary, Sir Samuel Hoare, unisoned in making the estimate.

While the service itself only asks £15,13,000, the secretary explained, the colonial office asks £3,116,700 for air use in Palestine, Trans-Jordania and Iraq, the admiralty wants £1,320,000 for the fleet, and other amounts including re-payments and other ordinary appropriations, bringing the total to the gross estimate given.

Ships Lost in Sea Wars

Washington.—President Coolidge added a new chapter to the air service controversy by making public the report of a special naval board convened by his direction, which found that the battleship remained "the final arbiter in war," and that airplanes would never "assume paramount importance."

Exports of Canadian Wheat To the United States

OTTAWA.—Exports of Canadian wheat to the United States during the past four years were given in the House in answer to a question by G. G. Coots, Progressive, Macleod. The figures showed that exports in 1921 were almost double those in 1920. Total exports in bushels in 1921 were 42,324,894. In 1922 they were 16,592,797; in 1923, 15,213,629; and in 1924, 21,288,507.

Deliver Report On German Disarmament

Alles Find Proof That Versailles Treaty Was Broken

OTTAWA.—A report of the allied military commission, prepared by the delegation of Germany's disarmament, accompanied by 12 lengthy annexes, was delivered at the offices of the allied war committee, presided over by Marshal Foch. Copies of the documents were immediately forwarded to the allied governments.

The absorption of the long and detailed exposition of the commission's operations will require a great deal of time, it is said in official circles. Most of the discoveries cited in the documents already have been made public, but a mass of new detail is given in the report, which, in the judgment of those who are aware of its contents, will prove abundantly the allied case against Germany.

The absorption of the long and detailed exposition of the commission's operations will require a great deal of time, it is said in official circles.

Canadian director of finance for the League of Nations, who has broached the subject of having the Geneva assembly hold a meeting in the Dominion.

Canadian Poultry For Europe

Association Will Ask Government Aid to Establish Market

OTTAWA.—With the object of building up a market for Canadian poultry, the Canadian Poultry Record Association at its annual meeting here decided to ask the government for assistance in the shipment of trial consignments of live poultry breeding stock from Canada to Great Britain and Europe during the coming year.

It was the feeling of the meeting that the advertising secured through the success of Canadian poultry at the Bologna and Wembley last year should be taken advantage of.

League May Meet in Canada

SIR HERBERT AMES

Canadian director of finance for the League of Nations, who has broached the subject of having the Geneva assembly hold a meeting in the Dominion.

The Cost to Date of Royal Grain Inquiry

OTTAWA.—The cost to date of the royal grain inquiry commission, which has just reported to the government on grain handling in Canada, is \$167,600. All the accounts are not yet in, and these are estimated at \$2,101, which will make the total cost to the country \$189,707. This information was given to Hon. R. J. Manion, Conservative, Fort William and Rainy River, by Hon. T. A. Low, minister of trade and commerce, in the House of Commons.

There are five competitions for judging live hogs, wool, market lambs, swine carcasses and lamb carcasses, with prizes totaling \$100 offered in each class. Each competitor is entitled to enter one member in the course and in addition the Swine Breeders' Association will nominate 30 others. Lectures and demonstrations will be given on various experts.

Increase In Family Budget

Labor Department Returns Show Advance for January

OTTAWA.—The average weekly family budget of 29 staple foods was \$10.77 for January, according to labor department returns. For December last, the budget was \$10.53, and for January a year ago, \$10.78. A similar weekly budget for January, 1923, was \$10.47 for January, 1922, \$11.03. This year for weekly family budgets was reached in June, 1920, when it totalled \$16.53.

The wholesale prices index number calculated by the Dominion bureau of statistics showed a substantial advance, being 16.2 for January as compared with 16.0 for September, 1922, and 15.7 for January, 1921.

The wholesale prices index number calculated by the Dominion bureau of statistics showed a substantial advance, being 16.2 for January as compared with 16.0 for September, 1922, and 15.7 for January, 1921.

Endorsed Privy Council

Plan to Establish Supreme Court in India Gets No Support

Delhi, India.—A motion to support the proposal in India to establish a supreme court in India was defeated in the Legislative Assembly of the province of Bihar and Orissa, and the bill was withdrawn.

It was the feeling of the meeting that the advertising secured through the success of Canadian poultry at the Bologna and Wembley last year should be taken advantage of.

PROPOSAL FOR AMENDMENT OF THE B.N.A. ACT

Ottawa.—Should the Canadian Parliament have the right to amend the British North America Act, Canada's written constitution? This was a question which held the House of Commons, W. F. MacLean, Conservative, South York, had a motion that the Dominion Parliament should be given such a power instead of amending the constitution by way of the British Parliament.

Under Mr. MacLean's motion, the Dominion Parliament would not have the right to pass any amendments affecting the rights of minorities as guaranteed in the B.N.A. Act.

Mr. MacLean urged that Canada should have the same right to amend her own constitution as had South Africa, Australia and the Irish Free State.

Hon. Ernest Lapointe, minister of justice, was opposed to the motion. He took the ground that Confederation was a pact between the federating province, and, being a pact, was it possible for the Dominion Parliament, which resulted in the creation of the Canadian confederation, to arrogate rights to itself without first consulting the provinces?

The B.N.A. Act," said Mr. Lapointe, "is not only the charter of the Dominion of Canada; it is the charter of the provinces"; and all the provinces should be consulted before the charter was amended.

Mrs. Snowden On Food Price Inquiry

First Appearance On Commission Since Return from Canada

London.—Mrs. Ethel Snowden, wife of Philip Snowden, former chancellor of the exchequer in Ramsay MacDonald's cabinet, took her seat when the royal commission on food prices opened its proceedings under the chairmanship of Sir Asquith Geddes. Mrs. Snowden was one of the government nominees to the commission, but this is her first appearance on the commission since her return from Canada.

Must Be Kept Out of Politics

Montreal.—"There is a good deal of talk about politics in the railway or the absence of them. I am convinced that the leaders of the three political parties in Canada want politics kept out of the railway and politics are quite sincere in this desire," said Sir Henry Thornton, in a speech here.

Would Keep Wilson's Birthday

Washington.—Woodrow Wilson's birthday, December 28, would be set aside as a national holiday, under a resolution offered by Senator Neely (Democrat, West Virginia). It was referred to the judiciary committee.

Over Liquor Down Sewers

Victoria, B.C.—Destruction of seized liquor held by authorities in various parts of the province was authorized by the government. Some liquor "bootleg brew" taken in blind pigs, and some in general use, was to be dumped in the ocean by the government agent. Thousands of bottles will be dumped down sewers, in a general liquor outpouring day, to be named by the officials, in order to eliminate the danger of bad liquor getting on the market.

Change is Necessary To Meet The Keen Competition

Ottawa.—G. G. Coots, member of the House of Commons, introduced a bill to improve the Canadian food products for home consumption. The people of Canada will soon be using New Zealand cheese and Danish butter, was the statement made in the House of Commons by J. W. Kennedy (Progressive member for Glenary and Stornoway).

"Quite right. That is just what will happen," agreed Hon. W. H. Mortimer, minister of agriculture.

Prevailing impression is that session will be a short one

Edmonton.—With all galleries crowded to the limit of their capacity, the Alberta Legislature was opened by Chief Justice Horace Harvey, deputizing for Lieutenant-Governor Brett, who is unavoidably absent in the United States.

Hon. Charles Stewart, minister of the Interior, was amongst those present.

Indications are that the session will be a short one. There are several government and private bills to be presented, but the prevailing impression is that none will produce debates of any length, and it is the desire of the government to clear the decks as soon as possible.

Over Million Estimates Approved

Ottawa.—Estimates totalling \$1,409,723 were approved by the house. The items follow: Post office department, civil government vote, \$1,143,725; agricultural department, dairying, including grant to national dairy council, \$230,000; agricultural department, for cold storage warehouses, \$30,000.

Plan Another Pier

Vancouver.—The Vancouver board of harbour commissioners is considering the construction of another great deep pier, equal in capacity to the Balfour Pier.

Arms School Burned

Arras, France.—This war-wrecked city has lost its boys' college by fire. The damage was estimated at nearly two million francs.

Competitions For Stock Judging

Offer \$500 Prizes For Agricultural Competitors in Saskatchewan

Saskatoon.—Judging competitions with \$500 worth of prizes will be staged at the Saskatchewan College of Agriculture, March 11, 12 and 13 in connection with the short course in bacon hogs and market lambs.

There are five competitions for judging live hogs, wool, market lambs, swine carcasses and lamb carcasses, with prizes totaling \$100 offered in each class. Each competitor is entitled to enter one member in the course and in addition the Swine Breeders' Association will nominate 30 others. Lectures and demonstrations will be given on various experts.

There are five competitions for judging

PEACE PROTOCOL IS UNACCEPTABLE IN PRESENT FORM

London.—The British cabinet discussed the Geneva peace security and disarmament protocol, on which it is felt some decision ought to be made as soon as possible. The London Times indicates that the report of the Imperial defence committee, which was submitted to the cabinet, bears the protocol to bits and shows that it is unacceptable to Great Britain. It is this is solved all the problems in Europe will be solved because the war debts are considered more a question of accountancy than anything else.

Government's proposal to settle the security problem has stayed dormant because Premier Herbert's time is occupied with the French financial crisis. However, he is expected to come to London during the first week in March, when a strong attempt will be made to reach a solution.

Home Bank Depositors

Belief Expressed That Fifty Per Cent. Of Losses May Be Paid

Ottawa.—"I never heard of it," stated Hon. J. A. Robt, acting minister of finance, when referred to the rumor that the government might make over the remaining assets of the Home Bank, paying the depositors 75 per cent. of their losses. "I should think," he added, "that the liquidator would be able to handle the assets."

There is a belief here, in certain quarters, that the depositors will be reimbursed to the extent of 50 per cent. of the total amount of their losses, with a slight possibility of receiving 60 per cent. So far, the liquidator has paid 25 per cent. of these claims and the feeling exists that the liquidation of remaining assets will enable a further payment by him to be made, however, it is understood, as to the value of the unliquidated assets.

Hungarian Settlers

Large Tracts of Land Purchased in Saskatchewan and Alberta

Winnipeg.—Migration of new settlers to Western Canada will soon be in full swing again, according to statements made by railway and colonization officials.

Announcement was also made here that the first contingent under the Hungarian family settlement scheme, sponsored by Aladar De Gedeon, nobleman of Anna, Hungary, would arrive in Canada late in March. Seventy families will settle about March 25, and 100 will be followed by another party in April.

Large tracts of land have been purchased by the De Gedeon interests at Indian Head, Sask., and at Trochu, Alta., and it is anticipated that 150 Hungarian families will settle in these districts this year.

Unemployment Figures

Ottawa.—A low level of employment throughout December and early January is indicated in the reports of the Employment Service of Canada. At the beginning of January the percentage of unemployment among members of trade unions was 11.6, as compared with 9.7 at the beginning of December, and 7.2 for January, 1924. The employment index number for January 1 stood at 53.5, compared with 50.8 on December 1 last, and with 51.1 on January 1, 1924.

Factors For the West

Toronto.—There will be a surplus of lumber in Toronto when the United Church of Canada becomes an actuality. To relieve this situation, it is expected that a considerable number will go to stations in the prairie provinces. amalgamation of the executive offices of the three existing churches will also release a few men for pulp work.

Earthquake in British Island

Montreal.—An earthquake was reported here from Grenada (British Island in the Windward Islands) announces that a prolonged earthquake was experienced there. The advice made no mention of any casualties or damage.

Early Election Forecast

Sarnia, Ont.—Hon. Duncan Marshall, local organizer of the Liberal party in Canada, addressing the West Lambton Liberal Association here, prophesied an early general election and urged Liberals to establish and perfect their organization.

War Vessel For B. C. Coast Service

Built at a cost of \$150,000 for the British Admiralty, the ship, the St. Florence, has been added to the Canadian Pacific British Columbia fleet of 23 passenger ships, freighters, barges, ferries and tugs. The St. Florence is now making her way under her own steam from Leith, Scotland, to Victoria via the Panama Canal.

Equipped with a steam-towing machine she is especially adapted to do the work she will be called upon to do in the company's trans-ports from which she will operate.

ALBERTA MUNICIPALITIES
ARE IN HAPPY POSITION

A somewhat unusual but eminently satisfactory feature of the provincial news these few weeks past has been the fact that several Alberta municipalities have closed their books with all accounts paid and a balance to the good. It has not been a wholly favorable year for tax collections in most parts of the province, and that some of the towns and municipal districts have done remarkably well in that respect is therefore the more gratifying.

There is no gainsaying the fact that more attention is being paid to the collection of taxes, including arrears, than was once the case. After painful and costly experience, municipalities have pretty well learned the lesson that non-enforcement in this direction can have only one result, and they have in most cases set themselves diligently to its application. Not all towns and municipalities have been equally successful. Some shining examples have made records for themselves, and some are still in trouble, but the great majority between the two extremes have, at any rate, bettered their financial condition and are on the way to ultimate victory.

The good name of Alberta at large and the safety of all local situations alike require continued emphasis upon this matter of tax paying and tax collecting. There is no other way by which safety can be attained, for if taxes are not paid no municipal organization, however fortunate or fortunate in other respects, can pay its own way. The question reduces itself largely to one of method by which the people may be induced to pay both promptly and regularly, and it might be of advantage if the methods adopted by those municipalities in Alberta and elsewhere which have cleaned up their accounts so satisfactorily were made known, for the consideration and emulation of others.

The Commercial Review.

WANTS THREE OF THE BRUTES

Mrs. Ralph Tennial, editor of the *Sabetha, Kansas, Herald*, declares:

"Every woman should have three husbands. One husband is needed to make money, one for social attendance, and the third for housekeeping."

This is what she told a gathering of Kansas editors at Topeka:

"The husbands, we have now are

satisfactory as far as they go. They

are experts at their leading charac-

teristic—that of making money. But

there are many details in being a hus-

band that they fail to grasp. My so-

lution is that every woman should

have three husbands. The one she has

shall be retained for bread-winning

purposes, at which he is eminently

and happily successful. A husband

No. 2 will attend us gladly, joyfully,

in our social pursuits, and a husband

No. 3 is needed to keep the domestic

wheels turning without friction. He

naturally would be of the tabby cat

variety who loves his home and all

little matters pertaining to it."

The account of the death of a well-known citizen contained in a down-east paper carries the heading: "A Step In The Right Direction."

The Blood Indians of Southern Alberta are laying plans for an all-Indian celebration to be held at Macleod on June 30th to July 4th.

Eena, meena, minah, mo!
Catch a song on the radio;
If it's squeaky, don't let it go,
Tune it in a little mo'.

Optimist.

TEACHERS AND COSMETICS

School trustees of Burnaby say they will not employ teachers who use rouge, powder and lipsticks.

This is very unfortunate.

School teachers make many sacrifices for their profession. They exist on starvation salaries. They wrestle with what is perhaps the most obstinate and perverse thing in the world, i.e., the young human mind.

And now, on top of these things, if they want to teach in Burnaby, they will have to make frights of themselves by abjuring the powder-puff.

Someone should tell these trustees that, so long as a young woman can teach children effectively, it doesn't make very much difference if she smears her face with green buggy paint, that what is important is not that which she puts on her face but that which lies behind the face.—Ex-

MAGIC

The game of curling, inasmuch as it makes for good fellowship and understanding between men and women, is a promoter of domestic happiness.

She parks her baby with a friend And piles her dishes in the sink; Pulls on her sweater, grabs her broom And hurries over to the rink;

(She could have had her dishes done But she was drawn to play at one).

She wins her game and is drawn To curl again at half past three, This is a bear-cat of a game Against her ancient enemy;

When she comes out, the lamps gleam high Like stars against the dark grey sky.

Now by all things that we've been told Of husbands and their ways,

This woman's man will surely cold And grievious trouble raise

When he comes home at close of day And finds dear wife is far away.

He goes and brings his offspring home, And builds the kitchen fire,

He sets the dinner on to cook,

No trace of slumbering ire;

But knowing what we do of life

We tremble for the erring wife.

At six o'clock her step is heard, Her voice is full of joy,

"Oh, Bill, I didn't do a thing

To Mrs. Pomeroy,

I took her out with my last stone

And we were one up coming home."

And as he stirred the baby's food

He said, "I'm glad you slammed her good."

With the compliments of the author — Nellie McClung.

When we "pass on" we will leave behind what we have and take with us Dr. Groff, inspector under the provincial Workmen's Compensation Board, is in town this week.

Copyright, 1922, by Rafael Sabatini
"CAPTAIN BLOOD," a Vitagraph picture with J. Warren Kerrigan
in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Peter Blood, a young Irish physician, is wrongfully condemned and sent as a slave to the Barbadoes. He becomes the friend and confidant of King James. There at the behest of Arabella Bishop, niece of the military commander, he is purchased by Bishop. Blood, Spanish by birth, is sent to the coast of Don Diego de Espinosa y Valdez, bombardier the city and captures it. Blood saves Mary Trall and Arabella. He leads his fellow rebels against the Spanish. Blood is captured. When Don Diego returns he takes him prisoner also and announces the sale of his prize. Colonel Hargrave goes to the ship to buy Blood's freedom and Blood holds him as hostage until safely out of port. Blood orders Don Diego to sail for Curacao, but the English, between the two, capture the ship under the very guns of Don Diego's brother. Blood and Don Diego fight the ship. Blood is overpowered. Blood and Don Diego's son cannot's mouth and forces him to consent to help make peace with the Spaniards by telling them all is well on the Cinco Llagas.

CHAPTER XII.—Continued

"If you please, Don Miguel, but that is all. You see, the King of Spain does not wish you to do. For the truth is that his wounds are not so grave as to have prevented his coming. It was his consideration of himself and the false position in which you would be placed if you had direct word from him of what had happened." Blood paused a moment. "What you hear from us is no more than a mere rumor. Your excellency understands."

His excellency frowned thoughtfully. "I understand . . . in part," said he.

Captain Blood had a moment's uneasiness.

"And we have in the boat below two chests containing fifty thousand pieces of eight which are to be delivered to your excellency."

"Not another word, in the name of Heaven!" cried the Admiral in alarm. "My brother wishes me to assume charge of this money, to carry it to Spain for him? Well, that is a family matter between my brother and myself." He broke off. "Hum! A glass of Malaga in my cabin; if you please," he invited them, "whilst the cheats are being hauled aboard."

And whilst sailors carried on board the two chests, the Admiral and Captain Blood exchanged toasts that damned eternally the bestridden James who occupied the throne of England. At the end Don Esteban timidly urged:

"My father is hasty to reach San Domingo. He desired me to stay no longer than necessary to embrace you. If you will give us leave, then, sir uncle."

In the circumstances "sir uncle" did not insist.

As they stepped into the waist of the Cinco Llagas, Hargrave advanced to receive them. Blood observed the set, almost scared expression on his face.

"Don Diego . . ." he was beginning, and then stopped, and looked curiously at Blood.

Noting the pause and the look, Esteban bounded forward, his face livid.

"Have you taken off your curs? Has he come to you?" he cried—and the six Spaniards behind him grew clamorous with furious questioning.

MISERABLE AND ALWAYS IN PAIN

Lydia E. Pinkham's Vegetable Compound a Dependable Help for Mothers

Port Greville, Nova Scotia.—"I took your medicine for a terrible pain in my side and for weakness and headaches. I seemed to bloat all over, too, and my feet and hands were the worst. I had to give up my work, and I am nursing my baby—the first one of four I could nurse." I said. Lydia E. Pinkham's Vegetable Compound is the best a birth to you can see how much it helped me. I cannot praise it too highly for what it has done for me. I took a pint of medicine every day. The vegetable compound is the only one that has helped me for any length of time. I recommend it to any one with trouble, I am sure, and I am sure it will be a testimonial."—Mrs. ROBERT McCULLY, Port Greville, Nova Scotia.

More often after a difficult birth the mother and baby are in pain. Lydia's Vegetable Compound is a blessing.

Many, many letters are received giving the same sort of experience as is given in this letter. Not only is the medicine good, but these good results pass on to the child.

No harmful drugs are used in the preparation of this medicine; just roots and herbs, and it can be taken safely by the nursing mother.

98 out of every 100 women reported benefits from its use in a recent canvas among women users of this medicine. G

loyally withersoever he should lead them.

If he resisted so long, it was the thought of Arabella Bishop that restrained him. And so, although he might entertain so dubious hope of ever winning her for his own, of ever seeing her again, yet the memory of her was to abide in his soul as a bitter-sweet, purifying influence.

He resolved being taken, he went actively to work. Ogeron, most accommodating of governors, advanced him money, and the admiral, in command of his ship, the Cinco Llagas, which he renamed the Arabela. To the score of followers he already possessed he added three score more, picking his men with caution and discrimination (and he was an excepional judge of men) from amongst the adventurers of Tortuga. With them all he entered into the articles usual among the Brethren of the Coast, under which each man was to be paid by a share in the prizes captured.

Towards the end of December, when the hurricane season had blown itself out, he put to sea in his well-found, well-manned ship, and before he returned in the following May from a protracted and adventurous cruise, the fame of Captain Peter Blood had run high, rippling before the breeze across the Indian Ocean.

One day, as he sat with Hargrave and Wolverstone over a pipe and a bottle of rum in the stitting room of the deck, he was accosted by a splendid ruffian in a gold-laced coat of dark blue satin, with a crimson sash, a foot wide, about the waist.

"C'est vous quiappelez Le Sang?"

"My name," he said, "is Peter Blood. The Spaniards know me as Don Pedro Sangre, and a Frenchman may call me Le Sang if he pleases."

"Good!" "My name," he informed the three men, two of whom at least were eying him askance, "is Leveps."

They had, indeed. He commanded a privateer of twenty guns that had dropped anchor in the bay a week ago, and had a crew mainly composed of French henchmen from Northern Hispaniola, men who had good cause to hate the Spaniard with an intensity exceeding that of the English. Leveps had brought them back to Tortuga from an indifferently successful cruise. A roaring, quarrelsome, hard-drinking, hard-gambling scoundrel, his reputation as a buccaneer stood high among the wild Brethren of the Coast.

It was current gossip that even Mademoiselle d'Oreron, the governor's daughter, had been caught in the snare of his wild attractiveness, and that Leveps had gone the length of audacity of asking her hand in marriage of her father, M. d'Oreron and gained the door.

Was this the man who now thrust himself upon Captain Blood with a proposal of association, offering him not only his sword, but his ship and the men who saluted in her.

Because he disliked the man, Captain Blood would not commit himself at once. But, because he liked the proposal, he consented to consider it. Being afterwards pressed by both Hargrave and Wolverstone, who did not share his own personal dislike of the Frenchman, the end of the matter was that within a week articles were drawn up between Leveps and Blood, and signed by them, and, as was usual, by the chosen representatives of their followers. These articles contained the common provisions that the two vessels separate, a strict account must afterwards be rendered of all expenses incurred whilst the vessel taking a prize should retain three-fifths of its value, rendering two-fifths to its associate.

Ancient Chinese Used Fireworks

Fireworks are said to have been invented by the Chinese in remote ages; but it is also claimed that so far as the Western World is concerned, they were invented at Florence in Northern Italy about the year 1360, and were exhibited as a spectacle in 1558. Lord Macaulay, in his history of England, states that at the conclusion of peace with France by the Treaty of Rywick in 1657, during the reign of William III, the fireworks let off in England cost £12,000, a sum fully equal to \$6,000 at the present time.

The geological survey denies knowledge of dry springs that start flowing just before the end of a drought.

Quick Relief For Rheumatism

Mrs. Bert. Young, of Fitch Bay, Que., writes as follows: "I could not turn over in bed at night. I tried doctors and sent for a physician, but he could do no good, but after using these powders of Minard's, my rheumatism left entirely, and I have never felt it since."

Always keep Minard's handy.

A Modern Adventure

Californian Making Good Progress Around World in Small Yacht

From Port of Spain, Trinidad, off the coast of Venezuela, comes the news of the arrival of Harry Pidgeon, a California man, who is sailing alone around the world in a four-ton yacht. Pidgeon, according to the dispatch, set out from Los Angeles in November, 1921. He crossed the Pacific and the Indian Oceans, rounded the Cape of Good Hope, and his ship was freed from the ice of the Southern Atlantic, in the South Atlantic, to Trinidad. This he accomplished in thirty-six days.

There remains still the trip from Trinidad to the Panama Canal, through the canal to the Pacific and up the western coast to Los Angeles. If the hook which has attended him so far holds good, he ought to make his home port by September.

The story of Pidgeon's voyage should make interesting reading. Yet it is doubtful if his accomplishment will equal that of Captain Joshua Slocum, who completed the circuit of the globe in 1890 in his boat, The Spray. For in Slocum's day there was no canal and the captain met his most serious difficulties in rounding the Horn. He had to wait a long time to realize that there remain those rare souls who are not content to get their adventure out of a book, but must make it for themselves.

Baltimore Evening Sun.

The Magazine Menace

Twenty-four Million American Periodicals Come Into Canada Yearly

There was no need for Major Baxter to apologize for his criticism of the flood of American magazines pouring into Canada. His address before the Montreal Publicity Association went straight to the point, and his emphasis of the dangers to Canada resulting from this menace is timely.

A casual glance at any news stand in this country will serve to convince the most sincere doubter that American periodicals have swamped all others in our reading market.

These periodicals carry an enormous body of advertising, which is a definite disadvantage to Canadian products.

In one year twenty-four million American magazines found their way into Canadian homes, with the inevitable result that the readers of those magazines have drifted into them every week the superlative qualities of this or that product over all other similar products in the world. Major Baxter's remedy, that Canadian producers should advertise more widely in Canadian magazines, in which to advertise.

The remedy lies in establishing and supporting Canadian magazines.

There is no reason on earth why we should welcome the flood of American periodicals and virtually ignore Canadian periodicals.

They had, indeed. He commanded a privateer of twenty guns that had dropped anchor in the bay a week ago, and had a crew mainly composed of French henchmen from Northern Hispaniola, men who had good cause to hate the Spaniard with an intensity exceeding that of the English. Leveps had brought them back to Tortuga from an indifferently successful cruise. A roaring, quarrelsome, hard-drinking, hard-gambling scoundrel, his reputation as a buccaneer stood high among the wild Brethren of the Coast.

It was current gossip that even Mademoiselle d'Oreron, the governor's daughter, had been caught in the snare of his wild attractiveness, and that Leveps had gone the length of audacity of asking her hand in marriage of her father, M. d'Oreron and gained the door.

Was this the man who now thrust himself upon Captain Blood with a proposal of association, offering him not only his sword, but his ship and the men who saluted in her.

Because he disliked the man, Captain Blood would not commit himself at once. But, because he liked the proposal, he consented to consider it. Being afterwards pressed by both Hargrave and Wolverstone, who did not share his own personal dislike of the Frenchman, the end of the matter was that within a week articles were drawn up between Leveps and Blood, and signed by them, and, as was usual, by the chosen representatives of their followers.

LITTLE HELPS FOR THIS WEEK

They shall mount up with wings.

Iso. XI, 31.

They like the bird for a moment

On a frail branch while he sings; Though he feels it bend, yet he sings his song.

For he knows that he has wings.

—Victor Hugo.

The soul is free. It has wings in the joy of pure emotion, in the wings in the springing might of faith, in the ardor of heavenly aspiration, in the swift flight of love, in the liberty of exultant hope. Love is always winged. If you would conquer your bevestments, rise to a more gracious benevolence, enjoy a livelier consciousness of eternal things, and have your Christian duties delighted; get the ardent, useful, consecrated heart of love through the grace of the Holy Spirit.

—Horatio N. Powers.

Success At Last

Mrs. Hall: "John, I believe you are doing well."

Mr. Hall: "Well, I've been trying for 15 years."

Man-Made Earthquakes

Excavations in England for Coal Sets Earth Sliding

It is believed that the numerous small earthquakes recently reported from the Midlands of England are due to the handwork of man. In excavating for coal and iron the miners cut away millions of tons of rock and coal and piles it on the surface, thus setting up all sorts of stresses. In July, 1913, dwellers near the coast of Carnarvonshire were startled out of their sleep by loud subterranean rumblings, while the earth quivered over an area of many square miles. It was found that a considerable area of land lying between the Rivals granite quarries and the shore had started to slide seawards. The fact was that the waste of the quarries which had years had been dumped on this lower ground, had proved too much for it, and had set the whole slide sliding, producing a very good imitation of a real earthquake.

King Interested in Beet Industry

The King's interest in the beet sugar industry has again been shown by his acceptance of a contract to grow beets at Sandringham for the new sugar factory at Spalding, Lincolnshire, for which contracts were recently taken up freely. His Majesty is already growing beets under contract for the factory at Cawley, Norfolk.

Scientist Has New Idea

Claims Origin of Languages Was Signs Of Zodiac

A new ship was launched recently on the seas of archaeology when Edward G. Geisinger, astronomer and searcher of antiquities, asserted he was able to trace the origin of 20 written languages to the signs of the zodiac.

His findings, Mr. Geisinger declared, proved that astronomy was a religious science familiar to the more intelligent classes of the ancient world upwards of 15,000 years ago; that the Bible, by means of zodiacal symbols, now may be made to reveal many secrets, religious and historical, which hitherto have been locked books; that Israel has a history going back 6,500 years into a period when its high priests, as revelers of the mysteries of the heavens, were more advanced in some branches of astronomy than the star-gazers of today, and that there have been fundamental errors in the rendering by Egyptologists of some of the earliest inscriptions found in Egypt.

Sour Stomach Risings Quickly Relieved

The wonderful comfort and relief you get from even twenty drops of Nervilene will amaze you. Take a spoonful in sweetened water; it's not necessary to swallow it immediately; you feel better. Nervilene brings up the gas caused by fermenting food, and at the same time relieves that distended feeling in the stomach. When colic or cramps strike you at night, when nausea or upset stomach occurs, Nervilene is a sure relief. For general use in the family, for emergent ills, always keep Nervilene handy on the shelf. Get 35c bottle to-day.

Dog Hero Dies At Home

Race With Anti-toxin Through Blizzard Caused Frozen Lungs

Balto, leader of Gunnar Kasson's team of Siberian wolves and canine hero in a recent relay race from Nome to Nanook with 300,000 units of diphtheria anti-toxin, is dead, according to his master.

At the request of his sister who suffered from an incurable disease, Anna Levasseur, of Paris, middle-aged dressmaker, shot and killed Anna, aged 29.

To relieve the French treasury of some of its difficulties, Deputy Louis Loucheur, former minister of commerce, proposes a \$200,000,000 loan abroad.

A committee of the League of Nations has recommended postponing calling an international conference for control of the private manufacture of arms.

Louis Dubois, former president of the reparations commission, contends that the United States should reduce her war debt claims on France to a very material extent.

A four million dollar loan authorized by the loan act of 1924 and underwritten by the Dominion Securities at 97.35% at five per cent, will be floated in England, according to an announcement.

Japan, the land of rice, is planning to buy supplies from other countries to provide a sufficient supply for her people during 1925.

When a bachelor gets tired of leading a single life he should get married and be fed.

WELL-MERITED SUCCESS

A distinguished citizen, honored politically and professionally, Dr. E. V. Pierce, whose picture appears above, made a success few have equalled. His pure herbal remedies which have stood the test for fifty years are still among the "best sellers".

Dr. Pierce's Golden Medical Discovery is a blood medicine and much alternative. It clears the skin, tones up the system, and the blood supply and the circulation, and pimples and eruptions vanish quickly.

Beauty is skin deep and good blood is beneath both. For your blood to be good, your stomach must be in condition, your liver active. This Discovery of Doctor Pierce's puts you in fine condition, and the blood is good. It is the most interesting drugstore for Doctor Pierce's Golden Medical Discovery, in tablet or liquid form, or send 10 cents for trial package of tablets to Dr. Pierce's Laboratory, Bridgwater, Ontario.

On a wager of \$150 a man in Los Angeles remained perched for 13 hours on top of a tall flag building 50 feet above a 13-story building.

Stop the Cough—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment will allay the inflammation and in consequence the cough will disappear. Try it and you will be satisfied.

Our idea of the bravest man in the world is the one who can eat hash in a restaurant.

Use Quinine for all toilet purposes.

Adopt Novel Method

Sink Oil Test Well In City of Medicine Hat

Something novel in the way of development will be attempted as the result of a plebiscite taken at Medicine Hat, which authorized the closing of a contract with C. E. Roth, of Oklahoma, to drill a 3,200-foot test well in the city.

The natural oil will purchase natural gas to the extent of \$75,000 from the well within 100 feet of the surface, caused by fermenting food, and at the same time relieved that distended feeling in the stomach. When colic or cramps strike you at night, when nausea or upset stomach occurs, Nervilene is a sure relief. For general use in the family, for emergent ills, always keep Nervilene handy on the shelf. Get 35c bottle to-day.

MADE HER BABY PLUMP AND WELL

Nothing makes a mother more grateful than a benefit conferred upon her child. Mothers everywhere who have used Baby's Own Tablets for their children are in enthusiastic terms about them. For instance, Mrs. Ziegler, Lakeview, Three Rivers, Que., writes:

"Baby's Own Tablets are a wonderful medicine for little ones. They never fail to bring a baby's appetite back to normal, and make him plump and well. I always keep a box of the Tablets in the house, and would advise all the ordinary ailments of childhood arise in the stomach and bowels, and can be quickly banished by Baby's Own Tablets. They are a sure remedy for colic and simple fevers, expels worms, allay teething pains and promote healthy sleep. They are great for the fresh infant, and especially safe even for the youngest and most delicate child. The Tablets are sold by medicine dealers or by mail at 25c a box from Dr. Williams' Medicine Co., Brockville, Ont."

It is a fact that the Tablets are to the size to make the stools.

If a farmer has only small patch of corn it may be cut by hand. The grain binder will handle crop of 100 bushels, and make satisfactory work.

Copyright, 1922, by Rafael Sabatini
"CAPTAIN BLOOD," a Vitagraph picture with J. Warren Kerrigan
in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Peter Blood, a young Irish physician, is wrongfully condemned and sent as a slave to the galleys of the Spanish Main. There at the behest of Arabella Bishop, niece of the military commander, he is purchased by Captain Blood, Spanish gallant and leader of the Cinco Llagas. Blood saves the city and captures it. Blood saves Mary Trall and Arabella. He leads his fellow revolutionaries to the Cinco Llagas, which he then named the Ambella. The score of followers he already possessed he added three-score more, picking them with caution and discrimination (and he was an exceptional judge of men), from amongst the adventurers of Tortuga. With them all he entered into the articles usual among the Brethren of the Coast, under which each man was to abide in his soul as a bitter-sweet, purifying influence.

"We do not break faith," said Haghorne firmly, so firmly that he quieted them. "And in this case there was not the need. Don Diego died in his bonds before you reached the Ensenada."

Peter Blood said nothing.

"Die!" screamed Esteban. "You killed him, mean. Of what did he die?"

Haghorne looked at the boy. "I am a judge," he said, "Don Diego died of fear."

Don Esteban struck Haghorne across the face at that, and Haghorne would have struck back but that Blood got between, whilst his followers seized the lad.

"He died before I left the Cinco Llagas," said Blood. "He was hanging dead in his bonds when I spoke to him before leaving."

"If I had known that," the lad said at last in a thin voice, "you would have been from the yardarm of the Ensenada at this moment. But you'll hang there!"

Captain Blood shrugged, and turned on his heel. But he did not on that account disregard the words, nor did Haghorne, as they shovelled at a council held that night in the cabin.

This council was met to determine what should be done with the Spanish prisoners. Considering that Sureau now lay beyond their reach, it had been decided that, going east of Hispaniola, they should make for Tortuga, that haven of the buccaneers.

It was now a question whether they should convey the Spaniards thither with them, or turn them off in a boat to make the best of their way to the coast of Hispaniola, which was but ten miles off. This course urged by Blood was determined.

CHAPTER XIII.
Tortuga

At daybreak Don Esteban and his followers were put off to a boat. Two days later, the Cinco Llagas sailed into the rock-bound bay of Cayona, which nature seemed to have designed for the stronghold of those who had appropriated it.

"My name is Levassieur"

It was Blood's original intention to make his way to France or Holland. But in the long weeks of waiting at Tortuga for a ship to convey him to one or the other of these countries, his resources dwindled, and finally vanished. Also, there was a good deal to oppress Peter Blood.

There was the thought of Arabella Bishop, now madly in love with the Frenchman.

He desired, yet knew he must, leave.

"Have you broken faith, you curs?"

"Has he come to harm?" he cried—

and the six Spaniards behind him grew clamorous with furious questioning.

MISERABLE AND
ALWAYS IN PAIN

Lydia E. Pinkham's Vegetable Compound a Dependable Help for Mothers

Port Greville, Nova Scotia—"I took your medicine for a terrible pain in my side and was well again in a week. I should to bloat all over, too, and my feet and hands were the worst. I am the mother of four children and a wife to a good man—his first wife of four years. I could curse. I took Lydia E. Pinkham's Vegetable Compound before the baby's birth, so you can see how it must have been. I did not part it too highly for what it has done for me. I took all kinds of medicine, but the Vegetable Compound is the only one that helped me for any length of time. I recommend it to any one with troubles like mine and you may use my letter for a sample. Yours truly, Mrs. McCollister, Port Greville, Nova Scotia.

Before and after child-birth the mother will find Lydia E. Pinkham's Vegetable Compound a help.

Many, many letters are received giving the same sort of experience as is given in this letter. Not only is the mother benefited, but the good result passed on to the child.

No harmful drugs are used in the preparation of this medicine—just roots and herbs—and it can be taken in safety by the whole family.

96 per cent of every 100 women reported benefit from its use in a recent canvas among women users of this medicine.

W. M. U. 1922

loyally withersoever he should lead.

If he resisted so long, it was the thought of Arabella Bishop that restrained him. And so, although he might entertain no delusive hope of ever winning her for his own, of ever seeing her again, yet the memory of her was to abide in his soul as a bitter-sweet, purifying influence.

The resolve being made, he went accordingly to work. Ogeron, most amenable of governors, advanced him money for the proper equipment of the ship, the Cinco Llagas, which he named the Ambella. To the score of followers he already possessed he added three-score more, picking them with caution and discrimination (and he was an exceptional judge of men), from amongst the adventurers of Tortuga. With them all he entered into the articles usual among the Brethren of the Coast, under which each man was to abide in his soul as a partner in the prizes captured.

Towards the end of December, when the hurricane season had blown itself out, he put to sea in his well-found, well-manned ship, and before he returned in the following May from a protracted and adventurous cruise, the fame of Captain Peter Blood had run like ripples before the breeze across the face of the Caribbean sea.

"If I had known that," the lad said at last in a thin voice, "you would have been from the yardarm of the Ensenada at this moment. But you'll hang there!"

Captain Blood shrugged, and turned on his heel. But he did not on that account disregard the words, nor did Haghorne, as they shovelled at a council held that night in the cabin.

"C'est vous qui appelle Le Sang?" the fellow halled him.

"My name," he said, "Is Peter Blood. The Spaniards know me by Don Pedro Sangre, and a Frenchman may call me Le Sang."

"Good!" "My name," he informed the three men, two of whom at least were eying him askance, "is Le Levassieur. You may have heard of me."

"They had, indeed. He commanded a privateer of twenty guns that had dropped anchor in the bay a week ago, manned by a crew mainly composed of French buccaneers from Northern Hispaniola, and he had had no cause to leave the Spanish waters in his endeavours to extort the English."

Levassieur had brought them back to Tortuga from an indifferently successful cruise. A roaring, quarrelsome, hard-drinking, hard-gambling scoundrel, his reputation as a buccaneer stood high among the wild Brethren of the Coast.

It was current gossip that even Mademoiselle d'Orgeron, the governor's daughter, had been caught in the snare of his wild attractiveness, and that Levassieur had gone the length of audacity of asking her hand in marriage of her father. M. d'Orgeron had shown him the door.

This was the man who now thrust himself upon Captain Blood with a proposal of association, offering him not only his sword, by his ship and the men who sailed in her.

Because he did not—because Captain Blood would not commit himself to him. But, because he liked the proposal, he consented to consider it. Being afterwards pressed by both Haghorne and Wolverine, who did not share his own personal dislike of the Frenchman, the end of the matter was that within a week articles were drawn up between Levassieur and Blood, and signed by them, and, as was usual, by the chosen representatives of their followers. These articles contained the common provisions that, should the two vessels separate, a strict account must afterwards be rendered of all prizes severely taken, whilst the vessel taking a prize should retain three-fifths of its value, rendering two-fifths to its associate.

(To be continued)

Ancient Chinese Used Fireworks

Fireworks are said to have been invented by the Chinese in remote ages; but it is also claimed that far as back as the Western World is concerned, the Chinese were the first to use fireworks. The Chinese used them in Northern India about the year 1560, and were exported as a spectacle in 1588. Lord Macaulay, in his history of England, states that at the conclusion of peace with France by the Treaty of Breda in 1667, during the reign of William III, the fireworks let off in England cost £12,000, a sum fully equal to \$60,000 at the present time.

The geological Survey denies knowledge of dry springs that start flowing just before the end of a drought.

Quick Relief For
Rheumatism

Mr. Bert Young, of Fitch Bay, Que., writes in: "I am a man of 50. I could not turn over in bed at night. I took doctors and sent off for medicines which did me good, but when using three bottles of Minard's Liniment, I have left me entirely, and I have never felt it since."

Always keep Minard's handy.

Minard's Liniment

THE ENTERPRISE, BLAIRMORE, ALBERTA.

A Modern Adventure

Californian Making Good Progress Around World in Small Yacht

From Port of Spain, Trinidad, off the coast of Venezuela, comes the news of the arrival of Harry Pidgeon, a Californian, who is sailing alone around the world in a four-ton yacht. Pidgeon, according to the dispatch, set out from Los Angeles in November, 1912. He crossed the Pacific and the Indian Oceans, rounded the Cape of Good Hope, and his last jump was made from the Cape to the islands in the South Pacific, where he is now.

He is accompanied in thirty-five days.

There remains still the trip from Trinidad to the Panama Canal, through the canal to the Pacific and up the western coast to Los Angeles. If the luck has attended him so far he will good, he ought to make his home port by September.

The story of Pidgeon's voyage should make interesting reading. Yet it is doubtful if his accomplishment will equal that of Captain Joshua Slocum, who completed the circuit of the globe in 1898 in his boat, the Spray. For in Slocum's day there was no canal and the captain met with many serious difficulties in rounding Cape Horn. In a word, he is a man of twenty-four million. American periodicals have swamped all others in our reading market. These periodicals carry an enormous body of advertising, and it is, naturally, advertising for the products of the United States. In this country there are twenty-four Canadian magazines found their way into Canadian homes, with the inevitable result that the readers of these magazines have drilled into them every week the superlative qualities of this or that product over all other similar products in the world. Major Baxter's remedy, that Canadian producers should advertise more widely in Canadian magazines, is, we fear, but a very partial remedy, for the simple reason that there are very few Canadian magazines in which to advertise.

The remedy lies in establishing and supporting Canadian magazines. There is no reason on earth why we should welcome the flood of American periodicals and virtually ignore Canadian and British periodicals.

There are twenty-four million American magazines found their way into Canadian homes, with the inevitable result that the readers of these magazines have drilled into them every week the superlative qualities of this or that product over all other similar products in the world. Local and General Items

When the driver is intoxicated, the car usually suffers.

Capt. W. A. Beebe was a visitor the early part of the week to Lethbridge.

The Rebekahs will hold a whist drive in the Lodge hall on Thursday night next, commencing at 8 o'clock sharp.

Mr. and Mrs. Tustian, of Cowley, were visitors the early part of the week with their son, S. L. Tustian, here.

A. McTeer, provincial manager for the Sun Life Assurance Company, was down from Calgary on Friday last.

Miners in Newfoundland are fighting against absolute honesty when they protest against the time-clock system.

The stork visited the Lodge hall during the whist drive proceedings on Friday night last and left a bunch of bouncing colts with ye editor.

Fifty-six congregations in the Trudeau district of Nova Scotia voted solid for church union and not one vote against. Other Nova Scotia districts voted 92 per cent for union.

AJAX COAL—We are getting, in a car of the above coal from Medicine Hat the first of next week. Place your orders now for delivery off car. —Phone 267, W. M. BUSH.

The entire output of some British golf ball factories is being exported to the United States on account of the increasing popularity of the game there.

The first move of what is thought to be the invasion of the west by the Loblaw Grocerias, Limited, with headquarters in New York and Toronto, is revealed in the decision of the big concern to open a store in Edmonton.

H. M. Bartholomew, secretary of the Edmonton labor party and candidate in the recent Edmonton by-election, is leaving that city. He had been at odds with leaders of the party on account of his strong communist views.

The biggest problem of the next twelve months will be finding positions for officials who have successfully tied up the coal industry in Alberta for the past year. The U. M. W. of A. remnants in the United States should pension the bunch off.

Advertising is the sunlight of business. To all that is healthy and vital in business it means increased strength and growth; but advertising is a fierce heat which withers and consumes that which is sound. A business which is not a good business should not be advertised. A business which would not benefit from widespread appreciation of its ideals had better acquire a new set of ideals.

At a recent session of the Macleod town council, Mayor McDonald suggested the formation of a stock company to finance the erection of a closed-in hockey arena, similar to those in this district. He impressed upon the council the fact that such an institution would be a decided asset to Macleod and it is confidently predicted that it will have eventuated into a reality for the winter of 1925-26.

Merchants throughout the province are on the warpath against the intrusion of the itinerant peddler in rural communities and the matter will be given serious consideration at the provincial convention of the Retail Merchants' Association to be held in Calgary on March 11th and 12th. The strongest argument is against these travellers selling their goods wholesale to merchants and then selling direct to merchants' customers at the same price.

"He comes, he comes!" Who? Why, "The Private Secretary."

John Ranyell Gresham, of Blairmore, has been appointed a commissioner for oaths.

It is proposed to erect a factory at Drumbeller, for the manufacturer of inks, paints, varnishes, etc.

Do you know? "The Private Secretary" will be in town on Tuesday, March the 17th, with St. Patrick.

Mrs. A. F. Link returned on Sunday morning from Calgary, where she had been undergoing medical treatment.

"Oh, my," wailed the young bride, consulting the cook book, "that cake is burning and I can't take it out for five minutes!"

Dr. D. W. Davis, formerly of Coley, has associated himself with Dr. Hanington in the practice of medicine at Kimberley.

Rev. John T. McNally, new Roman Catholic Bishop of Hamilton, has voiced his strong disapproval of Ontario's "temperate system of temperance."

H. C. James has been appointed district agent for the Metropolitan Life Insurance Company, replacing M. B. Huffman, who is on a two months' sick leave.

About forty people came up from Cowley and Lundbreck on Friday last and were sorely disappointed on finding that the big hockey game was called off.

"I have such a pain here!" Why? "From seeing 'The Private Secretary.' I'm going to see him again at the Blairstown Opera House on St. Patrick's night."

On March 1st, P. Burns & Co. will open an egg and produce buying station at Macleod, in charge of Mr. R. J. E. Gardner. Buying eggs by grade will be the chief feature of the station, and highest market prices will be paid in cash.

The Blairmore Juveniles and Taxis Juniors came out victorious in two games played with Pincher Creek on Monday of last week. The boys staged an exceptionally fine brand of hockey and were supported by about three hundred fans.

Mr. J. E. McLeod leaves tonight for Strathmore, where he enters upon a position in the Union Bank of Canada branch. General regret is felt at the removal of Mr. McLeod, but we understand that he is shortly to take charge of a branch of the above institution.

Various solutions of the difficulties confronting the miners are being suggested, the most amusing being that about fifty men be allowed to work steadily for the old scale of wages and that every cent of their earnings be handed over to a Bolshevik committee to be distributed among the "I Won't Works."

It is funny how some people discover the great importance and influence of their local newspaper when they get into a scrape. They live for years without subscribing, and when asked to advertise say "it don't pay." But the minute they get into some trouble things look different, and they cannot get to the editor quick enough to ask him not to say anything about it in the paper. Why?

The public are in perfect accord with the judgment handed down by Magistrate Gresham last week in the case of the two Belgians charged and convicted of breaking into stores at Coleman and taking goods therefrom. The goods were found in their possession and a nine-months' penalty was meted out, which should have the desired effect. Neither of the men were in want and both had fat bank accounts.

It is better to have loved and lost than to be sued for alimony and costs.

"Take him away—take him away, the horrid little thing!" Who? "The Private Secretary."

National, state and local taxes in the United States increased 198 per cent from 1912 to 1922.

Miss M. Bush, of Creston, has been visiting here with her uncle and aunt, Mr. and Mrs. Evan Morgan.

Dr. McNally was summoned from Lethbridge on Wednesday for special consultation re Mr. McEwan's condition.

A band of five bandits have been captured, following the holdup of the Millburg Bank at South Bend, Indiana.

Saturday was the biggest and best pay-day the city of Fernie has had in fourteen years. And they've got to be better, too.

One condition embodied in the contract for Jack Dempsey's matrimonial matches is that there are to be no hits in the clinches.

Mr. J. W. Verge, principal of one of the Calgary public schools, was end. Mr. Verge was one time principal of the local school.

And you have to give some men the credit for bringing home the bacon. If they didn't get the credit, they wouldn't have the bacon, nowadays.

The state house of representatives at Kansas City are introducing a bill requiring cows running at large to wear dust-proof head and tail lights.

John Herron, ex-M.P., was up visiting old friends in this district on Monday. He returned to Lethbridge on Tuesday, where he is spending a while with his daughters.

Mr. and Mrs. M. B. Huffman leave this week for Lethbridge, where they will reside for a few months. Mr. Huffman will continue medical treatment for blood-poisoning, under the care of Dr. Connor there.

The marriage took place at St. Albin's church, Coleman, on Saturday, the 14th February, of Beatrice, eldest daughter of Mr. and Mrs. J. T. Gelfand, of John Hopkins, an officer of the McGillivray mine.

Coleman is to have a junior order of the Knights of Pythias, taking into membership young men ranging from 14 to 21 years of age. The new order bears the name of Princes of Syracuse.

Mr. Kenneth G. McEwan, district drummer for the Campbell, Wilson & Horne Co., of Lethbridge, is seriously ill with pneumonia at the Cosmopolitan hotel. Word has been sent to his sister at London, Ontario. She is due to arrive here Saturday morning.

A successful whist drive was held in the Lodge hall last night by the members of Vimy Chapter, O.E.S. The prize winners were: ladies first, Mrs. W. R. Drake, consolation, Mrs. H. C. James; gentlemen's first, Mr. W. R. Drake, consolation, David Martin. Supper was served and dancing was indulged in for several hours, Professor Mason supplying music.

The new Tea-Kettle Inn opened for business on Saturday afternoon last.

If primitive people are naughty, original sin does it. If sophisticated people are naughty, boredom does it.

Jerry, six-months-old child of Mr. and Mrs. Jerry Vysolil, died suddenly at their home at Frank at an early hour Monday morning. The child was in apparent good health the evening previous. A postmortem examination held on Monday afternoon revealed an enlarged thymus gland as the direct cause of death.

A locomotive engineer must serve a long apprenticeship before he is entrusted with the running of an engine; and unless his eyesight is good enough to stand severe tests he cannot hold a job as an engineer. If such care is necessary in the case of a man who runs a locomotive on a track, should not equal care be taken to ensure fitness in the case of a man or woman who undertakes to drive a motor car along crowded thoroughfares where it is necessary to steer as well as to regulate speed?

REMEMBER

The thing that goes the farthest / Towards making life worth while; / That cost the least and does the most, / Is just a pleasant smile.

It's full of worth and goodness, too, / With genial kindness blend; / It's worth a million dollars, / And doesn't cost a cent.

—Exchange.
